Ask KB

Since for some reason I can’t figure out how to allow comments on pages like the ones on the top of the screen, we can use this instead.

If there’s anything you’d like to ask me, be it what I think of something, my opinion on a topic or if there’s something you’re not sure of, post it as a comment here. I get e-mail notifications when I get comments so I’ll definitely see this as I check my e-mail about every 12 seconds. There will be a link posted to this at the top of the site so you don’t have to go finding this all the time.
