

WWE Q3 Earnings Report

<http://corporate.wwe.com/news/2015/wwe-reports-strong-third-quarter-2015-earnings-growth>

Since most of us have little to no idea what most of this means, here's a quick summary:

1. Money is mostly up across the board, save for DVDs, likely due to the Network and WWE Studios because....well because it's WWE Studios.
2. The Network now has 1.2 million subscribers. It hits India next week and German/Japan in January, which should boost numbers even more.
3. Revenue is up 38% overall from this quarter last year, which is quite good.
4. Stock is down over 10% today because the stock market is screwy and there's almost no such thing as good enough.
