

All E-Book Prices Lowered

It occurred to me that \$3.99 is probably a bit too high for an e-book so therefore, all of the 24 e-books I've written are now available for \$2.99 each (the lowest amount I'm allowed to sell them for). That will be the case for any I release going forward.

Here's my Amazon author page with all the options I have available at the moment, including both paperbacks and e-books:

If you don't have a Kindle and need a free app to read an e-book on any device, you can find them from Amazon here:
