

Disqus Comments?

I'm not sure about this so I thought I would ask you all.

I've had issues with the comments system on here for years and the new one is only marginally better than the previous one. There's always Disqus but I've never been wild on it. I'm considering switching over to them but I thought I'd get another opinion. Does anyone like/dislike having Disqus comments as the commenting system? I haven't made my mind up one way or another and I could live with the system we have now sticking around.

Thoughts?
