

The Tinkering Continues (Mobile Version)

I've added a menu to the mobile version of the site. Now you should see a red bar at the top of any page on mobile with a drop down menu option. This will give you options for things like the home page, All Reviews, Ask KB and more. I'll probably be making some more changes in the future too. Let me know if there's something that you think would help/would like and if it's something I can/want to put in, I'll see what I can do.
