

The Tinkering Continues (Mobile Version)

I've added a menu to the mobile version of the site. Now you should see a red bar at the top of any page on mobile with a drop down menu option. This will give you options for things like the home page, All Reviews, Ask KB and more. I'll probably be making some more changes in the future too. Let me know if there's something that you think would help/would like and if it's something I can/want to put in, I'll see what I can do.

All Reviews Page Changed

It occurred to me that the All Reviews page was insanely long and I thought it was getting hard to navigate. I've installed a new thing on the right hand side where you can click on whatever category you like and you'll go to the same kind of list but only for the category you're looking for, such as WWE or TNA or whatever. You won't have to go through the big long list of them and it looks a lot neater. The regular All Reviews page is there still too if you prefer it.
