

# Security Updates

So as you've probably noticed, the site has had issues with things like "insufficient storage" and other such errors. They've been driving me crazy but since I'm not a tech guy, I've had no idea how to fix them. Now though, I think I've figured it out and I'll be trying to fix it. I'm not sure how well this will work and I ask for a bit of patience while I tweak things. It should work, but I'm not sure how long that will take. I'll be posting as usual, but hopefully with fewer site errors slowing me down.

Thank you as always,

KB
