

Links Page Added

Added in some sites that I like, some of which are wrestling related but some of which aren't. Enjoy.

Another Update

You can now reply to specific comments so rather than having one big line you'll see things branching off a bit. Should make debates/conversations easier here.

Updates

Added some stuff today as you can see. On the main page there are a few menus now such as recent comments, categories and so on which should make things a bit easier to understand and make the place a bit easier to navigate. If nothing else you can check and see if any of the previous 10 comments are about something you posted in so you can check for replies etc.

Hope this helps.

Ok so we're back now

Hopefully it sticks this time. Had to reset the place due to screwing something up. Think we're good now though. Comment here to make sure those work though.
